Waste Electrical & Electronic Equipment Declaration

The European Union Waste Electrical and Electronic Equipment Directive 2012/19/EU (WEEE 2012/19/EU) aims to reduce the amount of waste electrical and electronic equipment that ends up in landfill by raising the level of recycling of electrical and electronic equipment (EEE).

The WEEE Directive (2012/19/EU) requires manufacturers, distributors, importers and sellers of electrical and electronic equipment in the European Union to comply with the requirements outlined in the WEEE Directive (2012/19/EU) EUR-Lex - 02012L0019-20240408 - EN - EUR-Lex. However, the WEEE Directive (2012/19/EU) does not apply to integrated circuits or modules.

The integrated circuits and modules produced by Power Integrations are not within the scope as WEEE Directive (2012/19/EU), as they are classified as components for the final products.

Elving Garcia

Senior Director of Quality & Reliability
